THE

TELEGRAPHIC JOURNAL

AND

ELECTRICAL REVIEW.

VOL. IX.

JANUARY-DECEMBER, 1881.

LONDON:

HAUGHTON & COMPANY, 10, PATERNOSTER ROW, E.C.

Sc. 1480.10

1881, Jan. 29 — Dec. 30.

Farrar fund.

JUN 20 1917
TRANSFERRED TO
HARVARD COLLEGE LIBRARY

INDEX.

ACTINIC balance, 239
Aders', Clement, magneto-telephone, 239
Air, Moist, as electrical conductor, 167
Airey's, Sir G. B., resignation, 239
Alteration of electric lamp, 335
American Cable Company, New, 15, 161, 295, 360, 392
,, Commissioner of Patents, Annual Report of, 106
,, telegraphs, Proposed purchase of by Government, 148
,, Union Company, 66, 319
Anderson's, Chapman, galvanic batteries, Improvements in, 104
Anderson's patent amendment bill, 249
Anglo-American telegrams, Reduced tariff for, 134, 304
Anglo-American Electric Light Company, 86
Annunciator, Electro-magnetic, 213
Apps', Alfred, exhibits at Paris Electrical Exhibition, 353
Armstrong's, Sir William, address before Mechanical Section at British Association, 349
Arctic exploration, Use of telegraph for, 238
Ashantee, Telegraph material, etc., shipped to, 64
Asiatic Cable Bill, 134, 304
Atmospheric electricity, Action of, on vegetation of vine, 215
Attorney-General *v.* The Telephone Company, 6, 149
Audiophone, 147
Aurora Borealis, 67, 125, 146
Australian telegraphs, Mileage of wire of, 148
Austrian telegraphic service, 104
Automatic commutator for electric lights, 16; switch, 85
Avennarius, Professor, on principle of division of electric light, 256
Ayrton's, Professor, portable absolute galvanometer, 224

BAILLIE, M., behaviour of non-conductors, 103
Baillehache's, M., printing telegraph, 170
Ball's, Clinton, M., dynamo-electric machine, 415
Ball, C. E., soldering by electricity, 165
Banker's, S. M., electrical fire alarm, 2
Barraud & Lund's automatic system of testing time wires, 167
Bartelou's, M., fire alarms and telegraph lines, 170
Bartoli, M. A., galvanic polarisation, 32
BATTERIES—
Anderson's improvements in galvanic, 104
Blake's, 126
Coad's, 194
Delafield's, 486
Faure's 192, 269, 317, 321, 378, 384, 509
BATTERIES—
Galvanic, in Russia, 404
Hardy's, 384
Klein's, 105
Laurie's, 240
Maiche's, 140
Planté's, 257, 275
Ponci's, 67
Reynier's, 318, 361
Rousse's, 452
Sauvage's, 86
Secondary, Contribution to history of, 376
Secondary, yield of, 209
Storage, 509
Uelsmann's, 105
Becquerel, M. H., measurement of polarisation of ght under magnetic influence of earth, 405
Bede, M. E., Use of phosphor bronze for telegraph wire, 35
,, on telephonic lines, considered as lightning conductors, 405
Belgium, exhibits at Paris Exhibition, 275
Bell's, Graham, cable for telephone circuits, 320
,, induction balance, 406
,, modification of Wheatstone's microphone and its applicability to radiophonic researches, 254
,, photophone, Patent applied for, 34
,, photophone, researches on, 376
,, on production of sound by radiant energy, 179
,, Reception of, 66
,, telephone, antecedents of, 321
,, telephonic receiver, 214
Berliner's, E., photophonic transmitter, 49
,, telephone, 129, 259, correspondence, 278
Bidwell, Shelford, experiments on effect of temperature upon electrical resistance of selenium, 147
,, tele-photography, 82, 102
Biloret & Mora's new revolving contact for dynamo-electric machines, 147
Bjerkness's, Experiments of, 399
,, theory of pulsating balls, 238
Blake's microphone battery, 126
Blakey, Emmott & Co.'s exhibits at Paris Exhibition, 398
Bliss', George, telephone signal, 239
Blondlot's, M., experiments on selenium, 17
,, experiments on voltaic conductivity of heated gases, 167
Blyth, Professor, electric sonometer, 32
,, ,, on method of lighting by oxy-hydrogen light, 423
,, ,, on simple form of selenium cell, 91
Boat-race, Oxford and Cambridge, 149
Boudet's, Dr., microphone, 5
Boudet's, Dr., des applications du téléphone et du microphone, 109
Bouty, M. E., on change of volume which accompanies galvanic deposition of metal, 172
Börnstein's, R., experiments on influence of irradiation on conductivity of silver, 146
Boston Telegram, 194
Bottomley's, J. T., incandescent vacuum lamps, 378
Bourne & Son's exhibits at Paris Exhibition, 353 370
Brain, Metallised, 238
Brewster, Sir David, Centenary of, 240
Bright's, Sir Charles, single needle sounder, 59
Brillouin, M., on distribution of electric currents, 257
British Association, 296, 488
British Electric Light Company, Appointment of managing director, 487
British Electric Light Company, Legal proceedings by, 215
British electric light at St. Martin's-le-Grand G.P.O., 48
Brooks' cable at Bruges, Tests of, 149
,, experiments on the effects of temperature on insulation of paraffin oil, 5, 338
,, underground system, proposed by New York Gold and Stock Company, 148
,, underground system, 149, 297, 306, 316
Brooks', Junr., insulated wire cable, 338
Brush electric light in Broadway, 33, 49; Capabilities of, 65; Works in Cleveland, 320
Brush, Charles, storage of electricity, 319
Buchanan's electric lamp, 239
Bullet in human body, Localisation of, 317, 376
Bunsen's elements, Management of, 16
Butler's, Dr., electro-massage, 336

CABLE—
Aden-Bombay, 278
Brest, 15, 134, 276
Central and South American, 488
Cienfuegos and Santiago de Cuba, 90
Demerara-Trinidad, 226
Emden and Valentia, 297
entangled withship's anchor, 105
Falmouth-Vigo, 90
Faroe Islands to Iceland, 337, 384
Henley's Ozokerit Core—Correspondence, 197
Iceland, 338
Insulated wire, 338
Jersey, 422, 452
Key West to Havana, 268
Mexican, 112, 470
Mexico to Peru, 326
Nancy and Paris (subterranean) 128
New Atlantic Cable, 484
New Atlantic Company, 15, 161, 238, 268, 286, 295, 392

CABLE—
Orkney Isles, 260, 422
Pacific, Government aid to, 49
Property, Legislation for, 499
Rio Grande do Sul Monte Video, 90
Shetland, 240, 453
Ship, Design for, 310
Spanish, 34
Stornoway, 215
United States, West Indies, Mexico, and Central America, 268
West India and Panama, 489
CABLES—
Falmouth in communication with Bilbao and Madrid, 49
Canada, Telegraph wires in, 337
Cantoni's, G., theory of voltaic circuit, 17
Carbon pencils, Circular, for electric lamps (correspondence), 153
Carpenter, W. L., on Bell and Tainter's researches of Photophone, 376
Catalogue. Ransome's, Head and Jefferies, 49
Central and South American Cable Company, 128
Central and South American Cables, 509
Chance Bros.' electric revolving light for Sydney, 406
China, New telegraph line from Shanghai to Tientsin, 49, 102
,, New telegraph line from Shanghai to Pekin, 64
Chromic acid element, 317
Chwolson on influence of pressure upon electrical conduction-resistance of metal wires, 294
Circular area, Illumination of, 139
City and Guilds Institute, 171, 214, 294 (correspondence, 317), 333, 359, 386 (correspondence), 404, 420
Clamond's light, 49
Clerks and Telegraph Learners at Provincial Offices, 510
Clocks, Pneumatic, 148, 252
,, Synchronising, 166
,, wound up by electricity, 106, 256
Cloth wax, Electric phenomena on, 385
Coad's galvanic battery, 194
Commissioners, Appointment of, for Paris Exhibition, 275
Communicator, Electric, 259
Compagnie Française de Télégraphie de Paris à New York cable, Fault in, 34
,, Générale d'Electricité of Paris, 468
Company, Dublin Electric Light, 259
,, Dundee Electric Light, 385
,, Electric Light and Power Generator, 147, 422, 485
,, La Force et l'Electricité, 148

,, Lockwood, 193
,, Mosley, 166
,, Tainter, 385
and underground wires, 23
United Company, *v.* Graham, 103
,, ,, *v.* Maclean, 487
,, ,, and Plymouth Exchange, 454
United Company, 35, 50, 147, 148, 276
wires in Edinbro', 260
in Vienna, 169
Wheatstone Bridge arrangement, 275
Telephonic communication between Houses of Parliament and members' residences, 126
,, currents, Energy of, 386
,, receivers, selenium, Influence of temperature upon, 273
,, reporting, 319
,, system of Dr. Cornelius Hertz, 77, 417
,, system without conducting wires, 126
,, telegraphy, Cost of, 487
,, transmission, Causes which interfere with, 169, 192,
,, transmission of operatic music, 406
Telephoning between block signal cabins; correspondence, 175
Telephoning by thermic currents, 67
Tele-photography, 82, 102
Ternant, A. L., Les Télégraphes, 31
Tension and vibrations of a wire, Influence on, upon its electrical conductivity, 469
Testament, New, revision of, transmission by telegraph of, 258
Theatre, Beaufort, Electric light at, 360
,, Savoy, 407
Thermic currents, Telephony by, 67
Thermic or galvanometric laws of sparks in inductive discharges, 32
Thermo-chemical researches, 16
Thermo-electrophone (correspondence), 18
Thermometer alarm, 149
Thermophone, Reproduction of speech by aid of, 215
Thomson's, Julius, thermo-chemical researches, 16
Thomson, Sir William, before Physical Section at British Association, 346
Thomson's, Sir William, experiments on effect of strain on electric conductivity, 103; on economy of metal in conductors of electricity, 378; on resistance of dynamo coils and electro magnets of, 377; on uses of Faure's accumulator in connection with electric lighting, 378
Thunderstorms, 215, 240, 276
Tidal power for electric lighting, 453
Time ball at Kansas City, 276
Time wires, Automatic testing of, 147
Tomlinson's, Herbert, experiments with the photophone, 128
Tommasi's experiments on action of cold on voltaic arc, 485
Tommasi's improvement in duplex telegraphy, 147
Torpedoes and electric light, 484
Torsion, produced by electric current, 137; correspondence, 314
Tramcar, propelled by Faure's accumulators, 258, 275
Tramway, electric, 404
Trecul, M. A., description of curious electrical phenomena, 169
Tribe, Alfred, on refraction of electricity, 290, 309
Tricycles, Employment of, 149
Trouvé, M. G., experiments with electro-motors, 210, 336
Trowbridge, John, experiments on effect of temperature on magnetism, 295
Tube wire, Electric double swivelled disconnecting, 422
Tyndall, J., on action of radiant heat upon gaseous matter, 39

UELSMANN'S, DR., experiments on silicum wire, 17
,, ,, zinc-iron battery, 105
Underground wires, Brook's, 148, 149, 297, 306, 316
,, in America, 337
,, ,, England, Probable cost of, 488
,, ,, France, 488
,, ,, Germany, 405, 453
,, ,, Philadelphia, 16, 488
